Toslink Cable

Item Description:

Zignum TOSLINK connecting cables are the perfect addition to your high-tech equipment. The widely used TOSLINK connectors with a F05 port are sealed with 1mm FOC (fibre optic cable). The slim, highly flexible cable has a diameter of only 4 mm. Optical signal transmission is possible up to a range of approximately 20 Mbit/s. The advantage of a fibre connection in audio technology is that it achieves electrical isolation in the electronic components to avoid ground loops. Fibre-optic cables are also resistant to electrical and magnetic interference. In addition, noise emissions through cable-borne electrical digital signals are avoided. Connects various devices using the optical audio connection (e.g., amplifier, satellite receiver, Blue-Ray player, DVD player, LED, LCD, plasma TV, etc.). The supplied dust caps reliably protect the ends against scratching and other damage.

Specifications:

- TOSLINK connector F05 connection connector/plug
- Optical audio-input
- Optical fiber: 1mm
- Cable diameter: 4mm
- Signal transmission up to 20 Mbit/s
- Dust caps
- RoHS, CE certified
